7:00 pm
Minutes -Draft

Attending: Adrienne Magida, Mitch Osiecki, Sage Romey, Michael Levine, Joanne Mankoff, Kimberly Hagen

Joanne Mankoff moved and Kimberly Hagen seconded approval of the meeting minutes for October 13, 2025. Motion carried

Follow up on Mad River Path Advisory Committee - The committee has morphed from the Advisory Committee to the Implementation and Design Committee. Kimberly, Joanne and Adrienne will go to the next meeting in December to see who will represent Middlesex on the new committee.

Loop trail - update and next steps - A group of us worked two weeks ago and cleared the whole logging road section and stopped where the proposed trail goes off the logging road into the forest. Joanne suggested the Committee use the volunteer list to get more help with the trail work. Another work day was scheduled but then cancelled because the ground was covered with snow. Work will resume in the spring.

Bear Swamp puddle update - Eric Metivier said he would get to the puddle in the near future and will use clean fill. It was suggested that perhaps we could walk the puddles with Eric in the spring if he doesn't get to the work this fall. Adrienne will contact him again.

Update on Conservation Commission - Adrienne reported on finances, the Mad River Path, the Town cabin and knotweed.

Sage wondered if the Trails Committee put on reports on the winter conditions of the trails for skiers and hikers. We talked about group winter hikes on the marked trails.
Mitch informed the committee that a grant was received to do an engineering study at Walter Kelly park to study the feasibility and cost of waterfront access from the park.

The next meeting is December 8, 2025, the second Monday of the month.
